Two views of the model printed same size onto an A4 sheet of thin card and then assembled using small amounts of Bostik clear glue. You may wish to add corner strengtheners inside to increase durability. A Spencer Smith 30mm miniature has been placed alongside to give an indication of scale. By scaling the sheets during the printing process, the building can be made to suit any size of miniature. Permission granted to print the building as many times as desired. Resale forbidden.
